

Versatile & Reliable

A staple in the foodservice industry, the Univex PM91 is the go to powerdrive unit to prep in your kitchen. The PM91 is perfect for quickly slicing, grating, and grinding with a powerful 1HP motor and standard #12 hub attachment. Due to the versatility of the unit, customers have the ability to customize in various ways to meet their needs.

Proudly made in the USA, all attachments run at 250 RPM and will fit any accessories made for the #12 PTO Hub. Built with 10 gauge steel housing and a finished steel cover, this unit is made to last.

The PM91 is perfect for any operation looking to save labor cost on prepping their products.
