Buffalo Choppers!

univex

Univex buffalo choppers, also known as bowl cutters are a great way to prep your food with extreme efficiency. These units are great for prepping vegetables, cole slaw, pulled pork, chicken and more!

Univex offers 2 sizes, a 14" bowl and 18" bowl. Both units offer over 3,000 rpms a minute! Our BC18 also comes standard with a #12 PTO hub that can fit any Univex hub attachment.

Our units are designed for efficiency and operator safety. Utilizing important safety switches, which prevent the unit from running if the safety lid is not on. These units also present a bowl sensing switch which prevents operation without the bowl in place.

These units are built with top quality engineering and precision. Built with a solid stainless steel bowl, cutlery grade stainless steel twin blades and a polished and anodized aluminum body, these units will meet and exceed expectations.

Buffalo choppers are an excellent way to make pulled pork, parsley, prep root vegetables, boneless meat, cheese, breads, dips, salads, salsa and more!

Both of these units are continuous feed units. The longer the product is in the machine, the finer the cut is going to get!

For more information on these units, check out our videos and visit our website at www.univexcorp.com
